DC-7 NEW Diagnostic Ultrasound System

DC-7

Diagnostic Ultrasound System

What matters most:

excellent image quality in a value added ultrasound

Based on the latest imaging technologies, the DC-7 is engineered to deliver value added performance. Experience the excellent image quality along with a host of proven capabilities, only seen in premium systems.

- 4D imaging: real time, more details
- Contrast Imaging: enhance pathology structures
- iClear™: speckle noise reduction
- iCape™ view: wide field of view imaging
- iBase™ inversion tissue harmonic imaging
- iWide™ bandwidth and high density transducer technology for increased detail and contrast resolution

What is the real ergonomic design: user centric design for optimal operations

multi-function trackball and navigational
primary control are surrounded by 80% of the
systems core operations, minimizing your
fatigue after a long day of scanning.

High resolution LCD monitor

- Fully articulated monitor arm for maximum viewing capability
- iZoom: full screen image display to offer more visibility

Touch screen

- User definable selections and layout
- Multi-language input to meet your specific needs

How to improve your efficiency: streamlined Patient Workflow Circle

Experience the fast response functionality within complex environment of patient care. The DC-7 is your value and performance gateway to managing patient healthcare.

Easy to scan

- iTouch™: automatically optimize the image
- iStation™: powerful information management
- Auto calculation: LV trace and IMT
- User-defined packages and exam specific reports
